**SIGN UP**

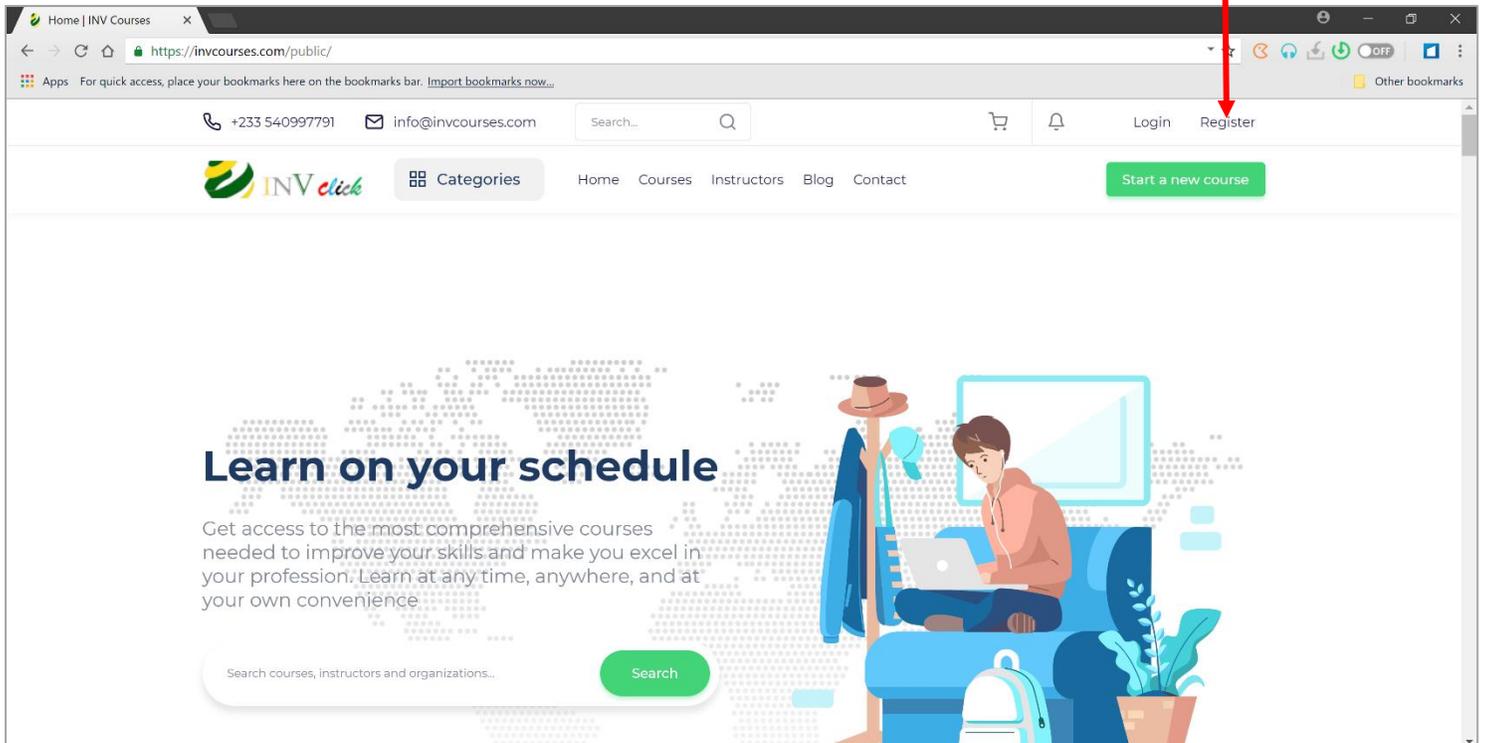

Create your Account today

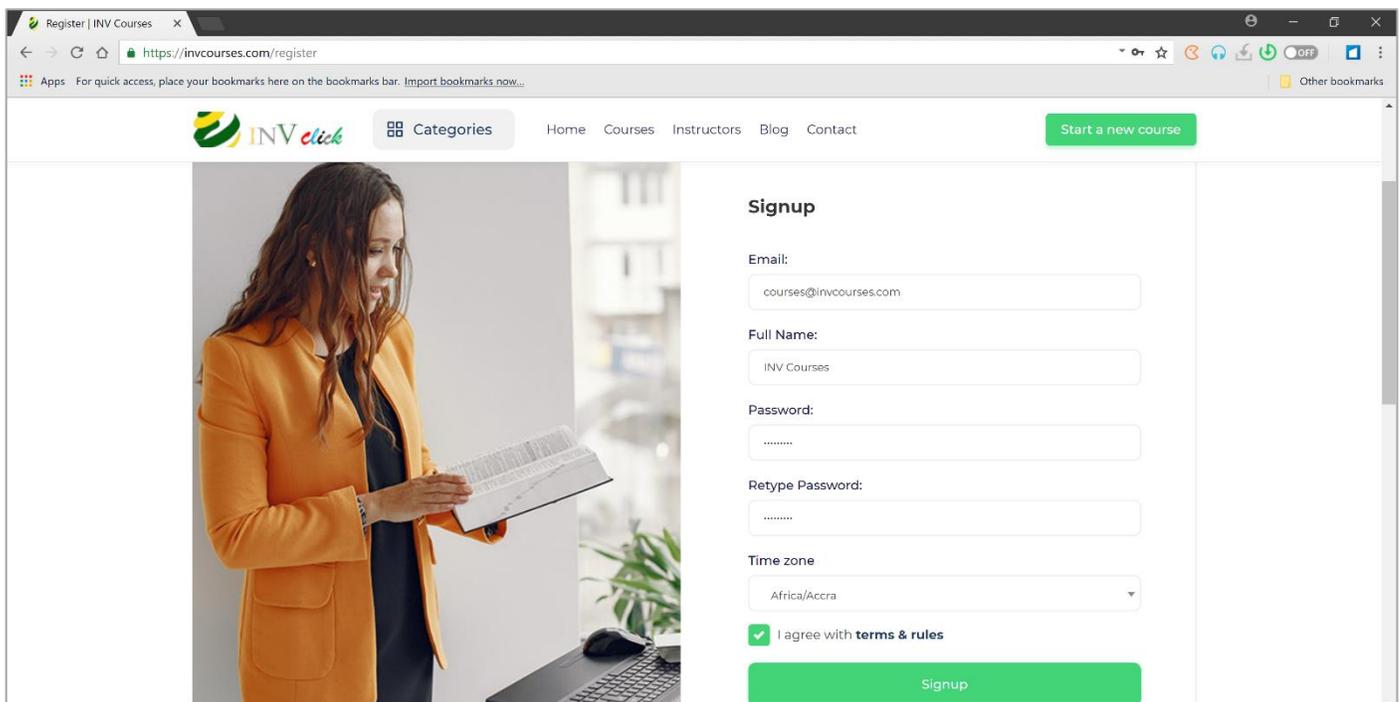

To sign up or register to INVCourses, visit [www.invcourses.com](https://www.invcourses.com) to get started.

On the Home page, click on "Register"

Click [Here](#) to Sign Up

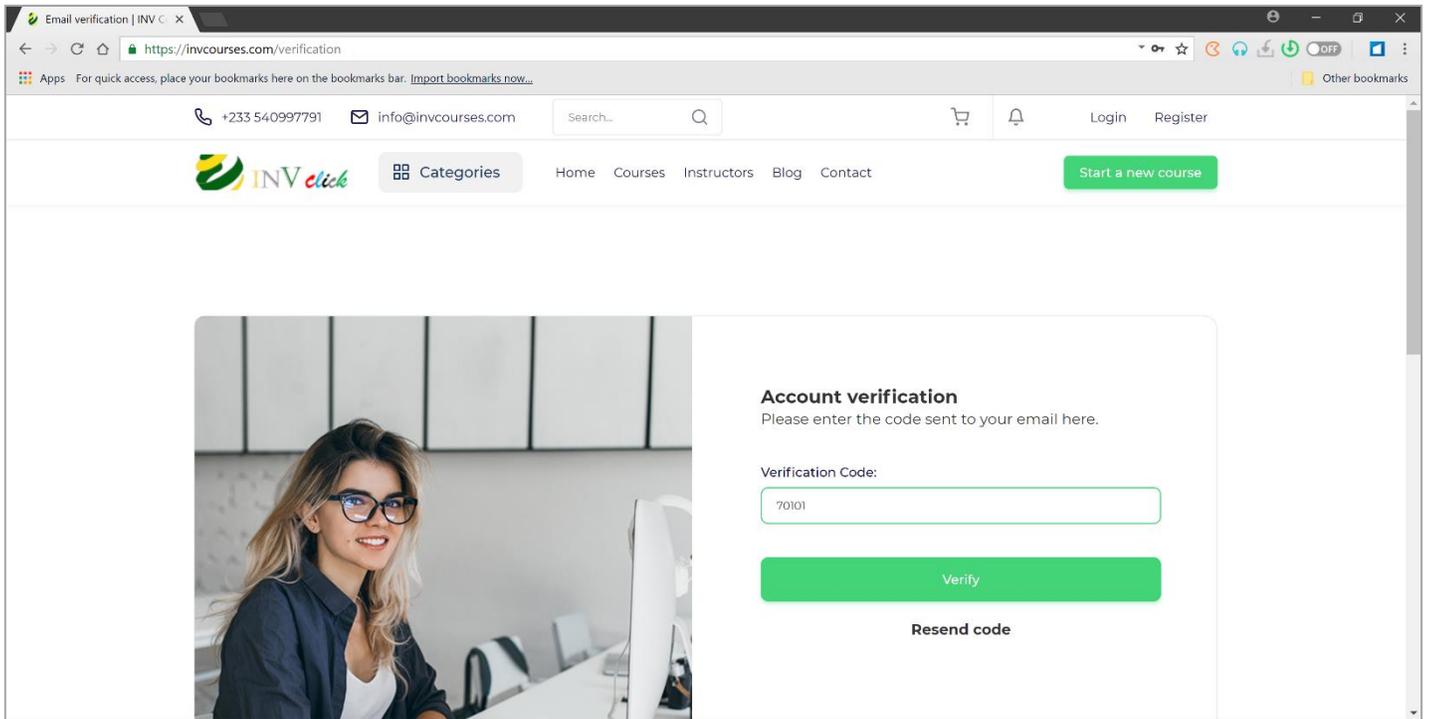

On the registration page, fill out the form with the required details.

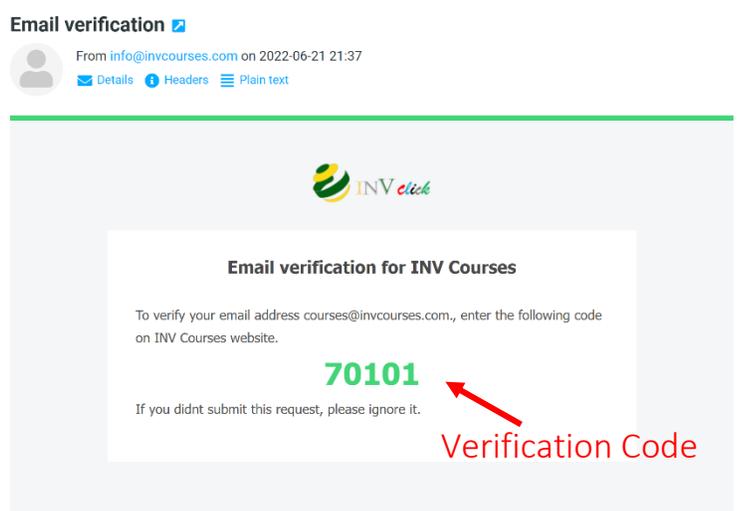

Tick the “I agree with **terms & rules**” box, then click on “**Signup**”

**PS:** Fill in with your actual name. this name would be used in generating a certificate after the completion of some courses. Also, use a valid email to receive a validation code and submit certificates.

Visit your email and copy and enter the verification to create your account.

Click on Verify to verify and create your account

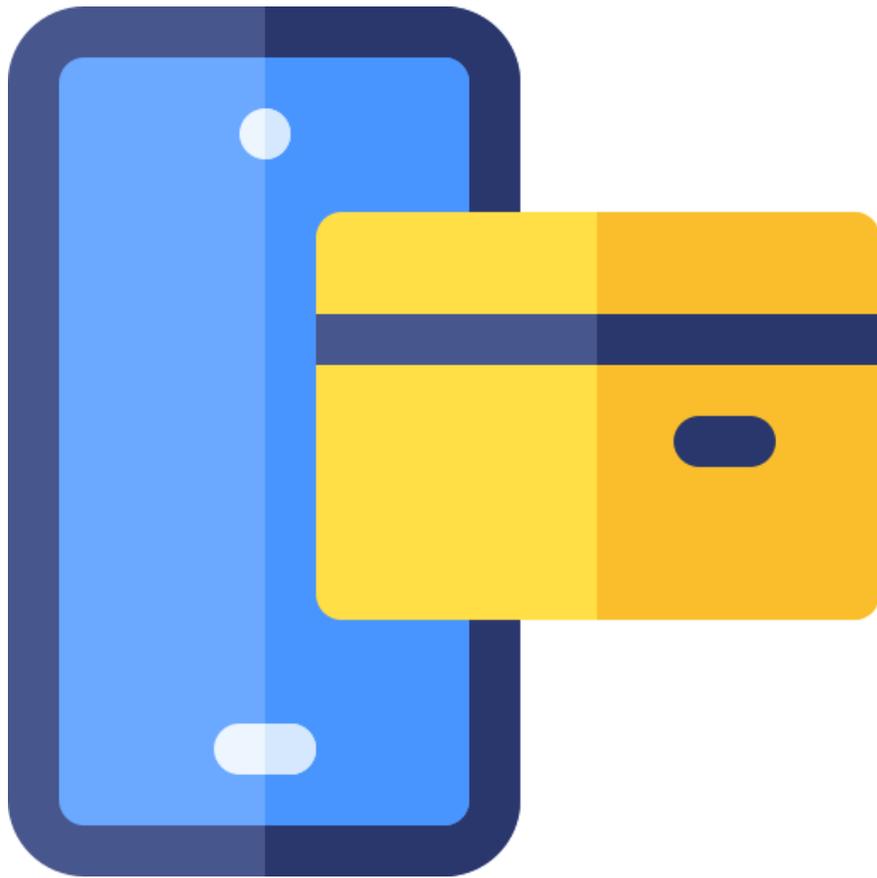

Click here to return to the home page

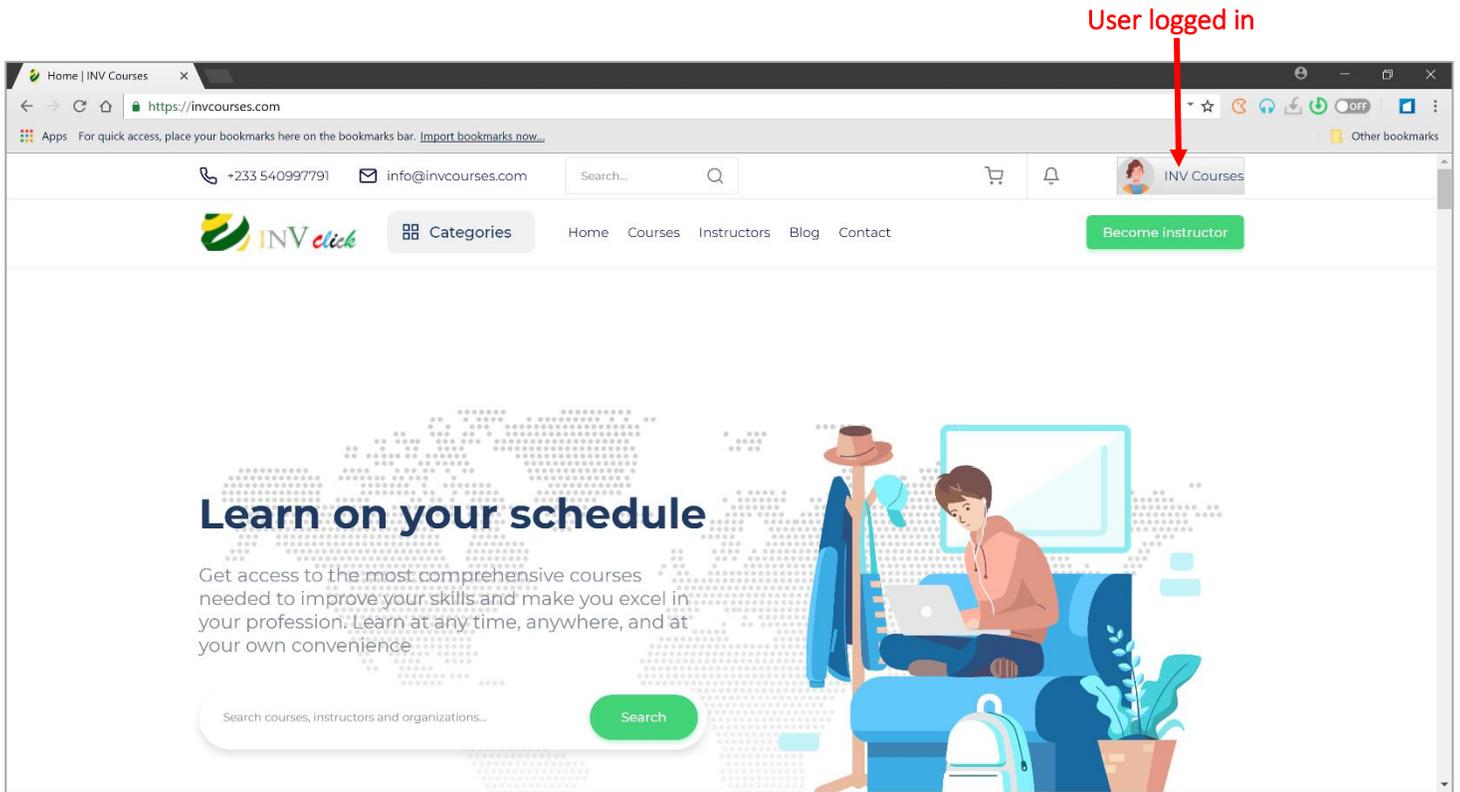

The screenshot shows the INV Courses dashboard interface. At the top, there is a navigation bar with the following items: 'Categories', 'Home', 'Courses', 'Instructors', 'Blog', and 'Contact'. A red arrow points from a blue callout box above to the 'Home' button. The main content area includes a greeting 'Hi INV Courses, You have 0 new events' and a 'View all events' link. Below this are several summary cards: 'Account Balance' (0), 'Charge account', 'Purchased Courses' (0), 'Support Messages' (0), 'Meetings' (0), 'Comments' (0), and a 'Next Badge' section showing '100%' completion and 'New User'. At the bottom, there is a 'Noticeboard' section with a 'New Year Sales Festival' announcement and a 'Learning Statistics' chart for 'Jun 2022'.

Click on the Home button to return to the page with the courses.

# How to Subscribe for a Course

**About this course**

This course is designed for Physical/ Urban Planners. It is designed to assist planners with available tools and resources that can be used in the digitizing of parcel maps for local plans and address maps. The course focuses on the use of the QGIS Quick Parcel Digitizer Model, as well as other plugins and tools within QGIS for parcel map design.

Model Approved

**Quick Parcel Digitizer**

**Name** Quick Parcel Digitizer

**Description** The purpose of the model is to assist physical and spatial planners to develop spatial digitized frameworks for the design and development of parcel maps for cities/ settlements. The model incorporates relevant geoprocessing tools in analyzing input data to create parcel blocks and road reservations which act as a framework for the internal design and definition of land uses and boundaries.
